

**QUIET AS A  
SPLIT SYSTEM  
AIR CONDITIONER  
..54 dB!**

## PSS52 Silent Compressor

Airless & Pressure Cleaner Services are proud to announce the new Peerless PSS-52 Silent Compressor. Peerless have developed this unit because of the increasing noise restrictions in industrial areas today. Boasting a low 54 decibels, this is as quiet as your split system air conditioner.

The unit has a cabinet in which every panel is removable for easy servicing, including the top. No other silent unit on the market has these features. The oil alert system on this unit is another first. Once the oil level gets too low before any damage can be done to the compressor unit it will automatically switch off and cannot be re-started until the compressor is filled with oil and re-started again. This compressor design is registered and patent applied.

## Product Specifications

Ultra quiet industrial compressor with innovative design features.

### Key Features

- Ultra quiet 54 dB operation
- Oil alert system
- Every panel is removable for easy servicing
- Supplied with 1m of 1" flexible HP hose
- Optional air receiver, pump time up to 150 PSI (approx. 2 minutes)

### Technical Specifications

- 990 LPM free air
- 175 PSI max. pressure, W95II pump
- 10 HP electric motor, 17 amps
- Weight 300 kg, 94 x 77 x 115 cm
